

CrossPointe Women Countdown to Christmas Week 1 Challenges

- Print out the pages listed below for your planner and start thinking about other things you may want to record. Don't forget to share your thoughts with the group. Mix and match the pages as you see fit. And if you are really creative & have a little extra time, you can create your own (we'd love to see).
- Pick up a 3-ring binder or notebook to store all of your print-outs in. Add plastic pockets (zippered or sealed for closing) or envelopes as a great place to keep your receipts or that great recipe you tore out of the magazine.
- Start thinking about gifts. In today's economy, the earlier we plan our gift giving, the easier on our wallets it will be. Start a list of all of the people on your list this year and start brainstorming. Remember to include family, friends, teachers, co-workers, babysitters, etc. Thinking about this early also gives you a chance to start making gifts if that's in your plan. There is nothing more stressful than making gifts at midnight on Christmas week (trust me, I know). So print out a [master gift list form](#) and start listing.
- Get that holiday picture taken! Plan to make an appointment for your family picture or set up your own photo shoot soon. You can stick your family in red & green even though it's not December yet - I promise we won't tell.
- Finally, get out your Christmas Card list from last year – or start a new one. Review your electronic lists and make updates as needed. If you use an old-fashioned paper and pen list, you can print one here.

Print-Outs:

Calendars

- [Christmas Countdown 2008 Calendar](#)
